

Distinguished Lectures in Microbiology

Fall 2015, Thursdays @ 3:30 p.m.

Ebling Symposium Center, Microbial Sciences Building

Department of
Bacteriology
University of Wisconsin-Madison

- | | |
|------------|--|
| SEPT
10 | Dr. Terry Krulwich Mt. Sinai School of Medicine
Insights contributed by alkaliphilic bacteria to OXPHOS, novel channels, & an antiporter with major roles in pathogens |
| SEPT
17 | Dr. Vincent Lee University of Maryland
Discovering cyclic-di-GMP interacting proteins & their inhibitors |
| OCT
1 | Dr. Steven Hallam University of British Columbia
TBA |
| OCT
8 | Dr. Kim Lewis Northeastern University
Uncultured bacteria in drug discovery & microbiome |
| OCT
15 | Dr. Philip Poole University of Oxford
TBA |
| OCT
22 | Dr. Tania Baker MIT
Unexpected activities & functions of the AAA+ protein unfoldases |
| NOV
5 | Dr. Sue Lovett Brandeis University
Replication gap repair in <i>E. coli</i> |
| NOV
12 | Dr. Jake McKinlay Indiana University
Microbial matchmaking: The metabolism & ecology of a hydrogen-producing bacterial coculture |
| NOV
19 | Dr. David Rudner Harvard University
How condensin compacts & resolves chromosomes: What the bacterium <i>Bacillus subtilis</i> tells us |
| DEC
3 | Dr. Emily Balskus Harvard University
Gut reactions: Discovering enzymes from the human microbiota |
| DEC
10 | Dr. Rick Gourse UW-Madison
Ribosome synthesis in bacteria: Stress responses, small molecule regulators, & chromosome folding |
