

Distinguished Lectures in Microbiology Fall 2009

Thursdays at 3:30 p.m. in Ebling Symposium Center, Microbial Sciences Building

- Sept. 24** **Dan Kearns**, Indiana University
"Bistable motility gene expression in *Bacillus subtilis*"
- Oct. 1** **Jade Wang**, Baylor College of Medicine
"Control of elongation of DNA replication and genome integrity"
- Oct. 15** **David Lipman**, NIH/NLM/NCBI
"Evolution in computational biology"
- Oct. 22** **Alex Horswill**, University of Iowa
ADAIR LECTURE
"Peptide quorum sensing in *Staphylococcus aureus*"
- Oct. 29** **David Dubnau**, Public Health Research Institute
"Many are called but few are chosen: Competence in *Bacillus subtilis*"
- Nov. 5** **Romé Voulhoux**, CNRS Marseilles
"Pseudomonas aeruginosa: An ideal playground to study
type II secretion"
- Nov. 12** **Rachel Whitaker**, University of Illinois Urbana-Champaign
McCOY LECTURE
"Genome dynamics in space and time in *Sulfolobus islandicus*"
- Nov. 19** **George Weinstock**, Washington University
"Adventures in the human microbiome"
- Dec. 3** **Tanja Woyke**, DOE Joint Genome Institute
"Microbial single cell genomics"
- Dec. 10** **Beronda Montgomery**, Michigan State University
"Shedding light of the regulation of cellular morphology in
cyanobacteria"
